

RAIDS is looking for young talents

About Us

RAIDS was established in 2020, aiming to boost the ever-increasing industrial digital servitization towards context-awareness, semantic cognition, and personalized recommendation/prediction in a human-cyber-physical system manner, by leveraging the cutting-edge AI and digital technologies.

Main Research Topics

- Smart Product-Service Systems
- Proactive Human -Robot Collaboration
- Cognitive Predictive Maintenance
- Digital Twin-Enabled Manufacturing Service
